

ENVIRONMENTAL POLICY

PRINCIPLES

We consider the protection of the natural Environment, the prevention of pollution and compliance with environmental laws to be key factors for sustainable development. As such, we seek the full involvement of all company staff with an approach aimed at minimizing our impact and at promoting good business practices which preserve and restore the Environment.

STAKEHOLDERS

We identify our stakeholders in our clients, in end consumers, in our workers, in suppliers and in the communities we enter in contact with. Furthermore, we acknowledge our responsibility towards the natural landscapes, ecosystems, soils, vegetation, wildlife of our planet and towards present and future generations.

COMMITMENT

The Group commits to building and maintaining an Environmental Management System in compliance with environmental laws and regulations applicable to our products and processes and to implement measures aimed at pursuing growth which is sustainable and respectful of the environment. To such purpose we undertake to:

Create awareness and promote the use of regenerated plastic content in the production of new packaging;

Adopt innovative solutions and models to foster the shift towards a circular economy for plastic

Orient client choices in terms of design, shape, weight and colour of packaging towards solutions which are entirely recyclable;

Streamline the carbon footprint of our industrial operations by introducing efficiency in energy consumption;

Streamline our transport supply chain, by promoting in-house operations, integrated logistics solutions, and maintaining a coherent logistic distribution of our operations;

Strive to neutralize the carbon footprint of our main industrial processes;

Provide prompt answers to stakeholder requests;

Define indicators and goals for the measurement of the success of the actions taken.

The present document must be read jointly with the Serioplast Group Manifesto and is assessed on a yearly basis by the competent functions.
